## **Synopsis**

This book is the first detailing the handbuilding of a fully functional Revolver, made from scratch, and with the most common and cheap tools - including possibilities to build it with plumbing-pipe or "printing it" with a 3D printer!

## **What people say about this book**

hiram j. dukes, "Good luck in bad times. This is is not instrumental. But douse give something to known before committing to D.I.Y.. I do wish it wasn't so small and included more information on 410 adoption."

John K. Dziki, "Dangerous but interesting. Very nice. Just a little info about it. Enough to be very dangerous to yourself. Gave me some ideas for a story."
